Assignment: Texturing – Emma Brown

Repo: https://github.com/Shadowisp911/DAGV-Essentials/tree/main/DAGV1100and1200/Maya/scenes/Maya%20Interior%20Assignment

My bad for not submitting sooner, I thought we had combined the UV unwrapping and Texturing assignments. I had lots of fun texturing, admittedly the metal texture I made with noise patterns is pretty weak, though I may end up replacing it later. I also added some roughness noise to the ceramic texture. One subtle thing that really made the wood on the shelf doors look more realistic was cutting and turning the corners like it would be in real life. I mainly got textures from Poly Haven.

Last week I ended up making some plants for my scene. I'm pretty happy with how the flowers turned out, one little trick I learned was to bend the rims of any leaves or pedals so that they have a softer, rounded edge that looks more organic. The tree turned out okay, I think it could be better, but it still adds to the scene. UV unwrapping the tree was a little confusing, but It worked out in the end.
